

Kindergarten Wonders

(as shared in Heard and McDonough, 2009, p. 63-64))

I wonder why elephants have their babies not in eggs.

I wonder why there were dinosaurs at all.

I wonder if the universe ever stops.

I wonder how New York City was built.

I wonder how butterflies' wings are created.

I wonder how people are made.

I wonder how locks are made.

I wonder how bricks are made.

I wonder why the sun goes down at night.

I wonder why the moon only comes out at night and not day.

I wonder how many years dinosaurs lived.

I wonder how come snakes can't close their eyes at night.

I wonder how car wheels can make a whole car move.

I wonder where sweetness comes from.

I wonder how snakes shed their skin from inside out.
