

Minnesota Industry Project

Name: _____ Pd. _____

Task: You will create a visual presentation that will EXPLAIN the factors involved in the Flour Milling, Lumber and Mining Industries developed in Minnesota. You may choose to do this project alone or in a group of no more than 3 people.

You have 2 class periods to prepare this presentation. We will work on this in class on _____ and _____. Any other work for this project must be done outside of class. You must be ready to present your project to the class on Monday December 7, 2009. Your presentation will include a one minute summary of your project. Late projects will not be accepted.

After school work days in room 3030

Monday November 30

Thursday December 3

Friday December 4

Steps:

1. Choose one of the 3 industries to focus on.
2. The presentation must **Explain** each of the following questions.

Introduction

- Where in Minnesota was this industry located? Why was it located here?
- What other parts of Minnesota were important to this industry?
- When did this industry develop in Minnesota?
- Who were the major people involved in this industry?

Natural Resources and Landforms

- Explain how natural resource(s) and/or landforms were important to this industry?

Industry's Affect on the Land-How did this industry affect the land?

- How has the industry changed over time? (What was it like in the beginning, what is it like now?)

3. Ideas for a presentation:

- Brochure
- Timeline including pictures
- Poster

Your project must include a map, and pictures to support the text.
